

New EtherNet/IP Weight Processor from Hardy

Big, Bright Multi-Channel Display

Hardy will be announcing the new standard in **weight processing**: the HI 6500 series. It's has EtherNet/IP, a Big, Bright Multi-Channel Display, and offers fast, high-resolution stable weight readings.

Weight processors are used as front ends to AB PLC control systems or standalone for all types of general weighing applications. Operating blind or with a display, they measure, condition and communicate weight values without any need to control.

Sneak peek before we announce it to the rest of the world on a [special page on our website](#) that you can only reach through this email.

Connect, view and control
one to four instruments
on one display panel

SUGAR	1.4113	FLOUR	4.8139
Gross	ton	Gross	ton
SALT	703.61	SATOR	491.88
Gross	lb	Net	lb

First, [Here's the Scoop](#) is a video overview that tells you the most important things you need to know in just five minutes. It takes a few minutes to download, but it is worth the wait.

Next, we have the [HI 6500 Launch Kit](#), which provides everything you need to know about selling this product.

There's even a [HI 6500 Series datasheet](#) so you can begin selling right away.

So find out about this amazing product before your customers start calling. Call us with any questions or an Application.
