

## REACH Compliance Statement

Neilsen-Kuljian, Inc., doing business as NK Technologies, supports the European Union Regulation 1907/2006 of December 18, 2006 that seeks to eliminate and/or limit the use of specific Substances of Very High Concern (SVHC) that potentially can cause a human health risk and/or a compromise to the environment.

Neilsen-Kuljian is a manufacturer of articles and as such is exempt from registration of substances. All Neilsen-Kuljian products meet the definition of an Article per the REACH directive (Article 3(3)), "Article means an object which during production is given a special shape, surface or design which determines its function to a greater degree than its chemical composition".

The substances present in Neilsen-Kuljian products are not intended to be released under normal or reasonably foreseeable conditions of use. Additionally, we have reached out to our supply chain in order to determine if they in turn use any SVHC'S. We have received written responses from our suppliers. Consequently we have been assured that they have conducted the appropriate due diligence research regarding the potential inclusion of restricted REACH substances and they have concluded that SVHC's are either not used or are used in concentrations less .1% by weight in the manufacturer of their components.

We have implemented internal sourcing control procedures whereby new components required for sustaining and/or new product development must have written statements from the component manufacturer attesting to the fact that the substances they use in the manufacture of their components are in compliance with the most current REACH directives.

In consideration thereof, we believe, to the best of our knowledge, that the products we design, manufacture and market either do not contain any substances of very high concern or contain less than .1% by weight of the currently defined substances. Should we become aware of new information to the contrary we will first work with our suppliers to eliminate and/or reduce the restricted substance source and/or if all else fails remove them as approved suppliers.

Neilsen-Kuljian is committed to ensuring the health, safety, and well being of people and the environment worldwide and will continue to practice these principles in our global business.
